

SMILE SPONGING

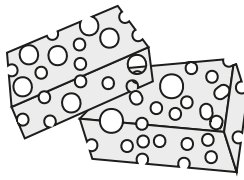

Materials Needed:

Pink / Red
Paper

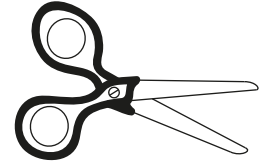

Computer
Printer

Sponges

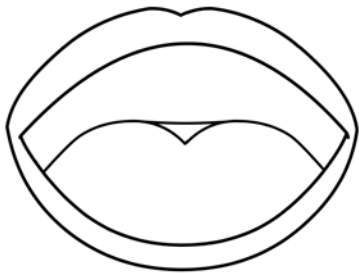

White
Paint

Scissors

Template Images:

Instructions:

1. Print the large image of our smiling mouth on a red or pink piece of construction paper.
2. Cut the sponge into different sized square pieces.
3. Squeeze a small amount of white paint onto a disposable plate/paint tray.
(MAKE IT MORE FUN! Add Mint Extract to the white paint to make the smiles smell minty fresh!)
4. Dip the sponge into the white paint, then use it to paint teeth onto the mouth template.
5. Have children sponge paint 10 upper teeth and 10 lower teeth into the mouth
or have them count their own teeth and try to make it match their own smile.

LEARNING TIPS!

- Use different sponges for different sized teeth to help teach about size differences.
- Make sure to have them count out loud for you and practice their numbers!
